HL7 AU Project Proposal

AU Patient Summary Inferno Testing Framework

Project Proposal

Project Title	AU Patient Summary Inferno Testing Framework
Project Description	Provide a facility to assist in the testing and conformance of systems with respect to the AU Patient Summary FHIR implementation Guide. Utilising the Inferno FHIR testing framework https://github.com/inferno-framework, a set of test cases aligned with the AU Patient Summary FHIR implementation Guide will be developed and a deployable version of this made available for general use by FHIR developers. The artefacts maintained will include: • Inferno test cases • Inferno cloud deployment (infrastructure as code) This is an ongoing project initially created to support: • HL7 AU Connectathon activities. • Validation assistance for implementers. The project requires: • HL7 AU Github open source repository • Open source HL7 AU administration/moderation The first year of the project will be undertaken by the Sparked Accelerator.
Project Proposer	Joshua Hare, Solution Architect – Toolin and Infrastructure, Sparked, josh.hare@Csiro.au
Target Release Timeline	Online conformance site available for Connectathons, testing activities, and other use prior to release. July 2026.
Primary Governing Work Group	HL7 AU FHIR Working Group
Primary Responsible Group	HL7 AU FHIR Working Group

Commented [DT1]: Put whoever will present at the FHIR WG - this just allows for contact interactions to be easy, there is no other special powers for a project proposer.
