HL7 AU Project Proposal

AU Encounter Record Summary FHIR Implementation Guide

This form is to be completed to propose new projects which may be specifications or infrastructure or other.

A project proposal is not necessary for new releases of previously published standards, or for reaffirmation, re-circulation or withdrawal ballots.

The correct completion of the submitted form will ensure that the HL7 Technical Steering Committee is presented with all the required information to support their consideration and approval process in a timely manner. The content will provide transparency to stakeholders on the project, expectations, direction and timeframes which in turn will support consensus-based standards development.

Please submit completed forms to projects@hl7.au

Project Proposal

Project Title	AU Encounter Record Summary FHIR Implementation Guide
Project Description	**Purpose** Develop and maintain an AU Encounter Record Summary FHIR Implementation Guide to support the exchange of encounter information within the Australian healthcare context. AU Encounter Record Summary will support the consumer and their health care providers with timely and current access to relevant encounter specific information to enable effective coordination of care. **Scope** • Representation of encounter information for exchange in an Australian healthcare context. • Monitor, comply with, and provide input to AU Core, AU Base, the FHIR standard, and terminologies including SNOMED CT and LOINC, where appropriate. • Align with clinical data requirements provided by the Australian Clinical Data for Interoperability (AUCDI) and the Sparked Clinical Design Group. **Usage of the Product** Used to support consistent FHIR implementation for exchanging encounter information within an Australian healthcare context.
Project Proposer	Danielle Tavares-Rixon, Sparked FHIR Lead, CSIRO, danielle.tavares-rixon@csiro.au
Target Release Timeline	Release 1 target of June 2028
Work Group	AU Core Work Group
