HL7 AU Project Scope Statement

AU Core FHIR Implementation Guide

This form is to be completed to propose new projects (Project Proposal & Project Scope Statement), or for new releases previously published standards, or for reaffirmation, re-circulation or withdrawal ballots (Project Scope Statement only).

A project proposal is not necessary for new releases of previously published standards, or for reaffirmation, re-circulation or withdrawal ballots.

The correct completion of the submitted form will ensure that the Board is presented with all the required information to support their consideration and approval process in a timely manner. The content will provide transparency to stakeholders on the project, expectations, direction and timeframes which in turn will support consensus-based standards development.

Please submit completed forms to projects@hl7.com.au

Project Scope Statement

<table>
<tr><td>Project Title</td><td colspan="6">AU Core FHIR Implementation Guide</td></tr>
<tr><td>Project Description</td><td colspan="6">AU Core uses AU Base and defines the data model and RESTful API interactions that set minimum expectations for a system to record, update, search, and retrieve core digital health and administrative information associated with a patient in Australia.
AU Core scope is intended to address:
• Basic patient details
• Basic provider details
• Problems / Conditions
• Medication orders, dispense, administration and usage
• Immunisation history
• Allergies and intolerances
• Diagnostic orders, report, and results
• Vital signs, and other clinical observation</td></tr>
<tr><td>Project Need</td><td colspan="6">This IG will promote interoperability and adoption through common implementation. It is intended to be used as-is, or built on top of to support specific use cases and vendor guides. This IG is expected to form part of future regulation.</td></tr>
<tr><td>Project Scope</td><td colspan="6">The initial phase of this project aims to develop and test the new R1 standard for AU Core through the Sparked FHIR Accelerator and go to ballot to be published as a working standard (HL7 AU Standard for Trial Use (STU)).

R1 will focus on data access for basic patient details, basic provider details, problems / conditions, medication orders, immunisation, allergies and intolerances, diagnostic results, vital signs.</td></tr>
