HL7 AU Project Scope Statement

AU eRequesting FHIR Implementation Guide Release 1

This form is to be completed for new releases for previously published standards or other products, or for reaffirmation, re-circulation or withdrawal ballots (Project Scope Statement only).

A project proposal is not necessary for new releases of previously published standards, or for reaffirmation, re-circulation or withdrawal ballots.

The correct completion of the submitted form will ensure that the Board is presented with all the required information to support their consideration and approval process in a timely manner. The content will provide transparency to stakeholders on the project, expectations, direction and timeframes which in turn will support consensus-based standards development.

Please submit completed forms to projects@hl7.com.au

Project Scope Statement

<table>
<tr><td>Project Title</td><td>AU eRequesting FHIR Implementation Guide Release 1</td></tr>
<tr><td>Project Description</td><td>Purpose
Develop and maintain an AU eRequesting FHIR Implementation Guide and other requesting guides as determined by need.
Monitor, align with, and provide input to AU Core and AU Base where appropriate
Maintain a series of evolving draft IGs to support early trial use
Cover both the requesting and fulfilment workflows in addition to the data model
Usage of the Product
Those building a diagnostic requesting repository
Clinical systems creating diagnostic requests
Provider systems fulfilling diagnostic requests
Patient systems that allow patients or their representatives to view diagnostic requests and their fulfilment</td></tr>
<tr><td>Project Need</td><td>There is a need to establish a nationally consistent and modern approach to electronic diagnostic requesting in Australia. AU eRequesting will lay the foundation by providing a national standard that uses HL7 FHIR to structure and exchange diagnostic requests. This will enable patient choice, support the tracking of request fulfilment, and promote interoperability across healthcare systems.</td></tr>
<tr><td>Project Scope</td><td>AU eRequesting Release 1 (R1) will support the use of HL7 FHIR for diagnostic requesting in an Australian context. It will define the minimum expectations on FHIR resources to support conformance and implementation in systems.
AU eRequesting R1 will define the data model and RESTful API interactions that set minimum expectations for placing and accessing electronic requests.
The scope of AU eRequesting R1 will be the support of pathology and medical imaging requests in community-based care provision, with consideration for future use beyond this scope.</td></tr>

Project Team	*Project Facilitator*	Michael Wilson, FHIR Solution Architect, Sparked
	FHIR IG Facilitator	Dusica Bojicic, FHIR Standards Developer, Sparked
	Publishing Facilitator	Brett Esler
	Vocabulary Facilitator	Michael Osborne, FHIR Terminologist, Sparked
	Modelling Facilitator	Heather Leslie, Kylynn Loi
Supporting Organisations	HL7 Australia	Brett Esler
	CSIRO	Kate Ebrill
	Department of Health and Aged Care	Cath Koetz
	Australian Digital Health Agency	Lisa Murphy
Other Interested Parties	-	
Developing Organisation(s)	Sparked participating organisations	
FHIR Accelerator(s)	Sparked	
External Drivers	The project is being developed by a national FHIR Accelerator which is sponsored by a partnership comprised of the Department of Health and Aged Care (DOHAC), the Australian Digital Health Agency (ADHA), CSIRO and HL7 AU.	
Dependencies	AU Base 5.1.0 (or current as of ballot/publication)	
	FHIR 4.0.1 (or current as related to AU Base)	
	AU Core 1.0.0 (or current as of ballot/publication)	
	IPS 2.0.0 (or current as of ballot/publication)	
	AUeReqDI (Australian eRequesting Data for Interoperability Release 1)	
	AUCDI (Australian Core Data Set for Interoperability Release 1)	
Related Projects	AUeReqDI / AUCDI	
HL7 AU Managed Project Repository URL	https://github.com/hl7au/au-fhir-erequesting	
Compatibility	Backwards Compatibility: N/A AU Base / AU Core Variance: Yes AU eRequesting will introduce new profiles that are not represented in AU Base or AU Core Implementation Guides. For example, new profiles to support AU eRequesting use cases using these resource types: • CommunicationRequest • Consent • Task New FHIR extensions will also be introduced to support AU eRequesting use cases.	

	An AU Variance Statement page will be included in the AU eRequesting FHIR IG to document the variances.
External Code Systems	Yes SNOMED CT, LOINC, NCTS (healthterminologies.gov.au)
Joint Copyright	No
External Project Collaboration	AUCDI project
Stakeholders	Clinical Peak Bodies, Software Vendors, Service Providers, Health Jurisdictions, Federal Agencies, Standards Development Organisations (SDOs).
>50% External Content -	No
Developers of External Content	N/A
Realm	AU
