HL7 AU Project Proposal

AU Patient Summary FHIR Implementation Guide

This form is to be completed to propose new projects which may be specifications or infrastructure or other.

A project proposal is not necessary for new releases of previously published standards, or for reaffirmation, re-circulation or withdrawal ballots.

The correct completion of the submitted form will ensure that the Board is presented with all the required information to support their consideration and approval process in a timely manner. The content will provide transparency to stakeholders on the project, expectations, direction and timeframes which in turn will support consensus-based standards development.

Please submit completed forms to projects@hl7.com.au

Project Proposal

Project Title	AU Patient Summary FHIR Implementation Guide
Project Description	Purpose • Develop and maintain an AU Patient Summary FHIR Implementation Guide • Purpose of the AU Patient Summary FHIR IG is to support generation of patient summaries in an Australian context. ○ A Patient Summary is: ▪ a health record extract comprising a core set of digital health and administrative data elements that provide a snapshot in time of a subject of care's health information and healthcare. ▪ designed for supporting use case scenarios including planned and unplanned care, continuity of care and transition of care. • Ensure coverage of data generation, data inclusion, and data access as recommended by FHIR implementation guide(s) • Monitor, comply with, and provide input to AU Core, AU Base, IPS, IPA, the FHIR standard, and terminologies including SNOMED CT & LOINC where appropriate The overarching principle adopted for the project is to be compliant with IPS and AU Core while supporting desired use cases, taking into consideration common clinical workflows in Australia. The project will identify and define candidate implementation use cases for the AU Patient Summary FHIR IG, and will collaborate with the clinical community on understanding the clinical workflows involved in the candidate implementation use cases. Australian clinical data requirements are expected to be provided from the Sparked Clinical Design Group.
Project Proposer	Danielle Tavares-Rixon FHIR Lead, Sparked, CSIRO Co-Chair AU FHIR WG, Co-Chair AU Core TDG danielle.tavares-rixon@csiro.au
Target Release Timeline	Intermediate draft snapshots from December 2024 and for each HL7 AU Connectathon R1 Ballot for Comment in the August/September 2025 cycle R1 Ballot for Working Standard in the February/March 2026 cycle, publish by June 2026 Continued updates on a yearly / 15 monthly cycle from then on
